Stainless Steel Steam Sterilizer

**SST2200<sub>Basic</sub>**, the first model of a new complete line of small steam sterilizers .

C.B.M. has merged its own experience in steam sterilization and its stainless steel manufacturing know-how, into a new line of bench top autoclaves conforming to **EN13060**.

**SST2200<sub>Basic</sub>** has a smooth, clean and minimal design but it is also equipped with the latest microprocessor technology.

**SST2200<sub>Basic</sub>** has been designed thinking to **easiness, reliability and durability**.

In other words **SST2200<sub>Basic</sub>** respects our main focus...

...quality in Your hands.

Class IIb  
Medical Device  
According to  
EEC/93/42

Conforming to:  
EN 13060  
EN61010-1 EN61010-2-040  
EN61326 EN13445

## Main characteristics

High quality materials used in **SST2200<sub>Basic</sub>** will assure it an incredible resistance.

The **frame** and the external **chassis** are manufactured entirely in **Aisi 304 Stainless steel** .

The front panels are manufactured in impact and **heat resistant techno polymer** enameled with a **special patented paint resistant to scratches, detergents and disinfectants**.

The **SST2200<sub>Basic</sub>** 23 It sterilization chamber is manufactured entirely in **Aisi 304 Stainless steel** and it is **deep drawn in a seamless piece**.

The absence of welding allows the **reduction** of chamber mass, reducing dramatically the waste of **electric heating energy** .

The **special treatment** of the chamber surfaces prevents water stains and improves the **easiness in cleaning**.

**SST2200<sub>Basic</sub>** is equipped with an **automatic motorized door closing system**.

The **new door** system has been designed in order to **eliminate** the **user effort**.

The door is fully closed only **during** the **sterilization cycle**. The **safety control** system **avoids door opening** if there is pressure in the chamber.

**SST2200<sub>Basic</sub>** is equipped with a **wide 5.7" Touch screen display**.

The **user friendly interface** guides the operator with **simple icons and explaining messages**.

The **wide and bright display** assures a **correct visibility** in all ambient.

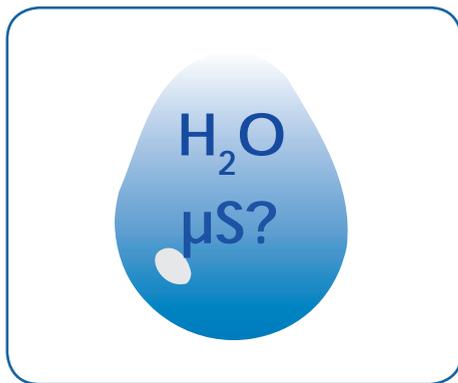

# SST2200<sub>Basic</sub>

## Main characteristics

All the **main devices** are mounted in an **easy access** way in the front panel.

SST2200<sub>Basic</sub> is equipped with an **integrated printer** for **recording** and the **traceability** of the **cycles**.

Through the **front panel**, demineralized **water** can be **auto-**  
**atically loaded** and **used water**, collected in the **separate tank**, can be **drained** .

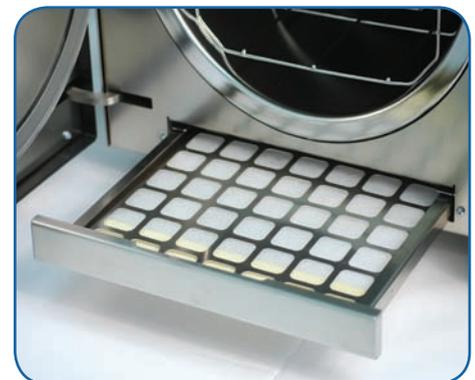

SST2200<sub>Basic</sub> is provided with a system for the **evaluation** of the **demineralized water quality**.

As requested by the **EN13060**, in case of poor water quality, the operator will be immediately advised by a message.

SST2200<sub>Basic</sub> helps You **preserving Your precious surgical instruments** and assuring itslef a **long working life** without damages caused by deposits.

SST2200<sub>Basic</sub> is equipped with a powerful cooling system. Thanks to a double fan **fresh air is always circulating** into the chassis . This system **prevents failures** and damages caused by sterilizer overheating.

As we know that "**clean device last longer**", SST2200<sub>Basic</sub> is equipped by an easy accessible **filtration unit**.

SST2200<sub>Basic</sub> control system is provided with different **app's** for the **reduction of electricity consumption reduction**.

**Stand-by app** will **reduce the waste of electricity** during non using phases.

SST2200<sub>Basic</sub> is equipped with an **steam generator** that, while assuring the **best steam quality**, **reduces the amount of water used** per cycle.

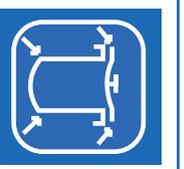

## Sterilization and test cycles table

**SST2200<sub>Basic</sub>** is provided with a **powerful vacuum pump** that assures the performances of the air removal system through **fractionated vacuum** technique.

The **P.I.D. control system** assures the **maximum accuracy** and "**Automatic Evaluation System**" controls the achieving of the **EN13060 requirements** in every cycles.

						
Cycle type EN13060	<b>B</b>	<b>B</b>	<b>B</b>	<b>S</b>	Helix & B.D. Test	Air Leakage Test
Sterilization Temperature	<b>121°C</b>	<b>134°C</b>	<b>134°C</b>	<b>134°C</b>	134°C	-
Sterilization Pressure	1.1 Bar	2.15 Bar	2.15 Bar	2.15 Bar	2.15 Bar	-

## Technical data and dimensions

<b>Chamber dimension</b>	Ø254 mm x 450 mm
<b>Chamber volume</b>	23 lts
<b>Chamber material</b>	Stainless Steel Aisi 304
<b>Steam generator</b>	Dedicated
<b>Steam generator material</b>	Stainless Steel Aisi 316
<b>Tanks</b>	1 for clean water + 1 for used water
<b>Tanks volume</b>	3 lts + 3 lts
<b>Nr. of trays</b>	Standard 4 • Extra 5
<b>Trays material</b>	Stainless Steel Aisi304
<b>Tray approx. dimensions</b>	(LxWxH) 380 mm x 190 mm x 20 mm
<b>Number of sterilization cycle</b>	4
<b>Test Cycles</b>	Helix, Bowie & Dick, Airleakage
<b>Printer</b>	Thermal printer, integrated
<b>Display</b>	5.7 " LCD touch screen display
<b>Temperature sensors</b>	3 PT1000 temperature sensors
<b>Pressure sensor</b>	1 absolute pressure transducer
<b>Voltage</b>	AC 230V
<b>Frequency</b>	50/60 Hz
<b>Power</b>	2050 W
<b>Export packaging (single)</b>	wooden pallet : 71x52x62 Cm - gross weight: 65Kg

SST2200<sub>Basic</sub> is **black** but can be supplied in **different colors** (depending on quantity)

Blue (min.50 pcs per lot)

Green (min.50 pcs per lot)

Grey (min.50 pcs per lot)

White

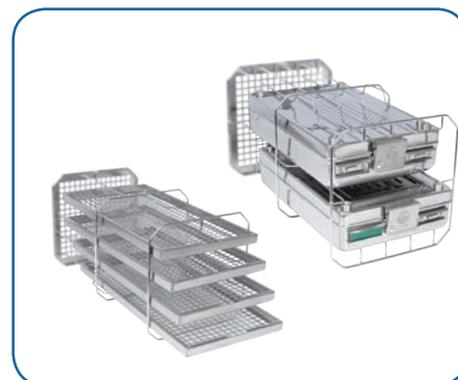

Standard accessories and packagings solutions

**SST2200<sub>Basic</sub>** is equipped with a **standard shelves rack** entirely made of **stainless steel wire**.  
Four stainless steel trays are provided standard in each autoclave.

The **shelves rack** accepts up to **5 trays** but it can be also turned in a position that accepts **2 "Small set containers"**

**SST2200<sub>Basic</sub>** is delivered with a **useful tray lever** with **heat protection handle** that prevents the contact with hot trays after the sterilization cycle.

Ask for **CBM Steam Sterilization Service catalogue**  
You will find interesting **packaging solutions** like the following examples!!

**CBM** offers You interesting **packaging solutions** for your daily sterilization procedures.

**SST2200<sub>Basic</sub>** can be used with our **"Small set containers"** already equipped with PTFE filters . This solution assures you **2000 sterilization cycles without disposable materials**.

Article	Dimensions (LxWxH) mm	Nr.Filters
395F+PTFE	285x185x65	1 (Lid)
395F2+PTFE	285x185x65	2 (Lid+Body)

**CBM** offers You also interesting **protection devices** for your precious instruments.

**"Small set baskets"** can be used inside "Small set containers".

"Small set baskets" are equipped with **sterilizable silicone "flexy-mat"** and **"soft lips" system**.

Article	Dimensions (LxWxH) mm	Lips
77T	270x170x35	Crosswise
77TH	270x170x35	Lengthwise
